SEALING

industrial design

Reliable in operation and cost-efficient membrane-O-ring sealing system. The O-rings are available in numerous material qualities, such as Viton, EPDM, FFKM or NBR and others. Proven for decades in a large number of industrial applications.

SEALING

sanitary design

atech LM-modules are designed to 3-A-Sanitary- Standard and cover all sanitary aspects for their application in micro- and ultrafiltration processes in Milk and Dairy Industry, Pharmaceutical, Chemical and Food Industry.

■ OVERVIEW

Technical data of atech standard pressure vessels

| | |
|-----------------|---|
| Material | Various stainless steel available, 316 Ti / AISI (1.4571) and 316 L / AISI (1.4404) |
| Filter surfaces | From 0.05 m ² to approx. 60 m ² per vessel |
| Pressure rating | PN 10 @ 110°C |
| Overall length | Up to 1500 mm |
| Fittings | Dairy coupling / threaded fittings / flanges |
| Sealings | Sanitary design (conical sealing), industrial design (o-ring) |

We will also manufacture customized vessels for your particular needs (like high pressure design).

■ ENGINEERING

The scope of our activities includes planning, design, calculation and manufacturing according to different regulations and directives, such as:

AD 2000-HP 0

German regulations concerning the principles for design, manufacture and the related inspections of pressure vessels.

2014/68/EU

European Pressure Equipment Directive concerning the principles for design, manufacture and the related inspections of pressure vessels.

ASME BPVC, Section VIII

Boiler and Pressure Vessel Code according to the American Society of Mechanical Engineers concerning the principles for design, manufacture and the related inspections of pressure vessels.

DIN EN ISO 3834-3

German quality requirements for fusion welding for metallic material

■ RETROFIT

Upgrading existing membranes for more competitiveness

Problem-free replacement/smooth substitution of competitors' membranes – irrespective of which manufacturer they are from. Due to a huge variety of adapters/gaskets we will enable you to continue with your existing pressure vessel equipped with new membranes.

A fundamental refurbishment with a low cost basis! We ensure that our membranes again deliver best possible filtration results for your process.

GENERAL INFORMATION

attech tubular ceramic membranes meet regulatory requirements for food contact according European Regulation no. 1935/2004 and FDA requirements 21 CFR, 170-199. attech crossflow membranes modules are authorized to bear the 3-A symbol for complying fully with the 3-A Sanitary Standard (certificate no. 3674)
